Erratum: DAGC—Data-Aware Adaptive Gradient Compression [1]

Rongwei Lu

Shenzhen International Graduate School, Tsinghua University

lurw24@mails.tsinghua.edu.cn

On page 8, Fig. 3 was miscompiled. In the published Fig. 3, panel (b) plotted a subset of the logged evaluation points, panel (c) duplicated panel (b), and panel (d) displayed the $\bar{\delta} = 1\%$ results. The complete figure is shown below.

(a) The label distribution for Flickr.

(b) $\bar{\delta} = 10\%$.

(c) $\bar{\delta} = 1\%$.

(d) $\bar{\delta} = 0.1\%$.

Fig. 3: The label distribution for Flickr (a) and convergence rate ... with the average compression ratio $\bar{\delta} = 10\%$ (b), 1% (c), and 0.1% (d).

In Section V-B, right column, "with the same accuracy (43%)" should be reworded as "with the same accuracy (45%)."

The experiments, the underlying data, and all reported results are unaffected. An extended journal version of this work is presented in [2].
